Partner with ERA for a FREE Data Security & Hard Drive Shredding Event During Fraud Prevention Month!

Fraud Prevention Month (FPM) is a month-long initiative dedicated to empowering individuals and communities to recognize, report, and stop fraud. To support this important cause, the Electronic Recycling Association (ERA) is offering a **FREE Data Destruction and Electronics Recycling Event**—and we would love to collaborate with your law enforcement agency to make it a success.

This event will feature ERA's **portable hard drive shredder**, allowing agencies and the public to securely destroy sensitive data stored on hard drives, phones, tapes, and other compact devices. Additionally, attendees can responsibly recycle outdated electronics at no cost, contributing to a safer and more sustainable community.

What Happens to Collected Devices?
All collected devices will be refurbished and donated to charities on ERA's waitlist, which includes over **500 organizations** in need of technology. Your participation will directly help bridge the digital divide by equipping nonprofits, schools, seniors and community groups with the devices they need to support their missions.

Event Highlights:

- **Secure Data Destruction**: Safely shred personal and professional devices to prevent data breaches.
- **Electronics Recycling**: Promote sustainability by responsibly disposing of old electronics.
- **Support for Charities**: Refurbished devices will go to organizations in need, making a meaningful community impact.
- **Fraud Awareness & Education**: Engage with the public on how to protect sensitive information and prevent fraud.

Important Notes:

- The portable shredder is available **only for agencies within 1 hour of our operating location**.
- Agencies outside this radius can **host a collection event** where community members can drop off their devices. ERA will arrange a **courier pickup** for secure shredding at one of our facilities.

By hosting this event, we can work together to protect citizens, support charitable organizations, and reduce e-waste. Let's join forces to fight fraud and empower our community—one shred and donation at a time!

Would your department be interested in co-hosting or facilitating this impactful event? Let's connect to discuss the details!
