CACP Canadian Public Safety Interoperability Workshop What's Next?

Join us for the 14th of its kind public safety interoperability event from February 2nd to 4th, 2025 in Toronto. The CACP Canadian Public Safety Interoperability Workshop promises to be an interactive, problem-identifying and problem-solving workshop.

On a daily basis we're reminded that public safety and emergency management is all about ensuring timely, coordinated and effective emergency response, while also preparing for and recovering from these types of events. We need to get the right information to the right people, including our communities, at the right time.

The good news is that many agencies across Canada, and around the world, are excelling at making this happen. However, with the speed and frequency of major events, disasters and critical incidents we need to be constantly looking over the horizon to prepare for whatever critical event is next!
